FRIDAY SEPTEMBER 18, 1942

NUMBER 21

Beet Digging Gets Under Way

Right in the midst of the wheat harvest, sugar beet harvesting commenced Wednesday afternoon and today wagons and trucks loaded with the sweet roots, are converging on the Factory from every point of the compass. By the first of the week, when digging will be general, loads will be standing in line at the scales waiting their turn to pull in and unload and get back for another one while roads and weather remain good.

The agricultural department has estimated a crop of 350,000 tons this year, based on field samples so far taken and tested at the two factories, here and in Picture Butte. Sugar content is high for this early in the season, and a heavy run of sugar is expected, as the sugar content will increase as the digging advances.

The local factory has been tested out this week in all departments to see that machinery is all in first-class condition, and that all juice lines are tight and ready to go. All presses, evaporators, and other apparatus has been overhauled and ready to go, and the lime kiln was fired up Thursday morning to get slack time for the treatment of the juices for the purifying processes they undergo. The turbines were tested out for a few hours last week, and at 8 a.m. Monday morning they were put on the line and will continue steadily now until the last of the beets are converted into sugar. Piece by piece during this week the engines, pumps and all on have been cut in on the steam lines to give them all a final testing, and the tentative date for commencement when the beet whistle will blow of slicing is next Wednesday or the first of the beets to go in.

A good-sized crew is on duty now, and letters have been sent out to a full crew to report for work when the start of campaign arrives. There seems to be work for all, but we have not heard of any decided shortage in manning the various stations at the mill, although there appears to be no surplus.

Harvesting Delayed

Tuesday afternoon about 2.30 a shower fell, being light in town, but decidedly heavy for a few minutes at the factory and also just west of town. This stopped and the skies cleared, and it looked like good weather, but just before dark on Tuesday night, rain commenced falling again and continued almost uninterrupted through out the night. At daylight Wednesday morning it was still raining lightly and water was standing in all the low places in the streets and roads. Hardly any rain fell Wednesday, but it was cool all day and things didn't dry very much, on Thursday several showers fell at different times of the day.

Harvesting of grain will be held up for all of this week at least. Binders had just started again Tuesday at noon, and wherever this storm hit they will be tied up until next week. Beet digging was to have started Wednesday and deliveries to the factory Thursday, but the storm made the ground so muddy and nasty that digging was out of the question.

While the moisture is good for pasture and summerfallow, it is certainly slowing up harvesting operations. Very little combining has been done, and cutting with the binder is certainly slowed up by these storms. Third cutting of alfalfa is about ready, some of it cut, just in time to catch this storm.

Skies cleared Friday night and frost was noticeable in the morning. Just what damage was done has not been reported. However it may result in settled weather.

The Capitol Theatre has been newly decorated this past week, Ernest Reithman having charge of the new and attractive front which this popular theatre now wears.

Both to Mr. and Mrs. E. H. Wastaff at St. Michael's Hospital, Lethbridge, on Thursday September 10th, a baby daughter, Mother and daughter are doing fine and "Ted" is all smiles.

BOB ZOBELL WANTS ACTION

A recent Winnipeg paper contained a picture of Flight Sgt. Bob Zobell standing beside the Spitfire which he took thru the recent commando raids at Dieppe, of which so much has been written.

The picture shows Bob's forehead bandaged, from shrapnel wounds, and the tail of his plane partly shot away by machine gun fire. He brought his ship home safely despite this damage, was only slightly wounded himself, and his only complaint was that the Doctor wouldn't let him go back any more that day for another crack at the enemy.

FIRST CANADIAN PARATROOPS ARE GRADUATED

Fort Benning, Ga., Sept. 12. The nucleus of the first Canadian parachute battalion—20 enlisted men and six officers—received the silver wings of qualification jumpers from the American parachute school here Friday.

The presentations were made by Brig-Gen. George P. Howell, commandant of the school, assisted by Maj. William T. Ryder, assistant commandant and recently returned from a study of parachute training in Britain.

HANCOCK BABY DIES

The infant of Mr. and Mrs. A. E. Hancock which was born early Saturday morning died just a few hours after birth and was buried in the local cemetery. Sympathy is extended to the parents in their bereavement. The mother is doing as well as can be expected under the circumstances.

The duck shooting season opened Monday morning and local hunters were out in fairly large numbers. Ducks are reported as rather scarce and bags were small although some very fine birds were taken.

Our "Colonial" War

For all that Canada has been in this war for over three years, Canadians still do not recognise themselves as parties of the first part as far as the fighting is concerned. We have still not divorced ourselves from the old colonial attitude of being a participant in some one else's undertakings. We are going to help Britain in this or that one of her war theatres; we have not yet thought of them as our theatres of war. We are going to help Britain meet an emergency by a general provision of credits for her purchase; we haven't yet realised that Britain and her people are part of the weapon we are using for our own defence.

When we come to that realisation we may lose some of our pride in our own generosity, but we will gain immeasurably in the directness and realism of our thinking. As long as we continue to think in terms of what we are doing to help some one else, we give colour to the attitude of certain minorities that this is just another colonial war. It is not entirely surprising if these Canadians try to treat this war as something similar to the South African war where, as a gesture of Empire participation we sent an expeditionary force to fight a distant battle concerned us very little. This war is more real to us, but not yet real enough to instill in us the deep and burning anger of a people who have been wretchedly attacked and who know that their only hope is to utterly destroy the power of the forces ranged against them.

The United States, though to our mind slow to enter this war, suffers from no delusion that she is fighting for some one else. Pearl Harbor ended that way of thinking with a conclusiveness that permitted no argument, that convinced a whole people that this was no altruistic crusade, undertaken to help some one else. The war is starkly and realistically a challenge to a way of life. There are no side issues. Either defend it or lose it. Canada has had no Pearl Harbor, and there is a grimmer in the United States' attitude to this war that is lacking in ours.

There was a striking evidence of this sterner attitude when an American military court condemned six saboteurs to death and summary execution because of the threat of an attack against the safety of this state. During the past year or two there have been a considerable number of such escapes in Canada, and in some cases definite evidence has been made public that the prisoners received out-possibly the Mounted Police, side assistance in their escape, who are charged with such duties, have tracked down and punished such offenders. The veil of secrecy that covers all their actions prevents us from knowing this. But what is of still more importance to Canada is the attitude of our people to such happenings. We have been interested in the reports of these escapes, but they haven't disturbed us. The fact that somebody must have assisted has roused no feeling of anger.

We haven't been able to realise that these things were an attack on our own safety.

No one wants to stir up a spirit of blood lust, but if we are to achieve what we must achieve in order merely to live, we must find in ourselves a capacity for just and righteous anger. People who give help and comfort to the enemy are the enemy, a far more potent and dangerous and insidious enemy than enemy soldiers in the field.

Quite recently the Hon. A. L. Macdonald, Minister of National Defence for Naval Services, denied the rumoured landing of saboteurs on our eastern coast, an added that submarines operating off our Maritime coast had not secured provisions and supplies from Canada. One does not make denials of that nature unless there is a widespread belief in the subject of the rumour. And if there is such a belief, there is a recognition that some of our nationals might give assistance to his enemy. If there is cause for such suspicion, Canadians should know of it. Perhaps that is the sort of Pearl Harbor that might wake us to the realisation that this is very much our war, that it is our lives and Canada's shores that are in danger, and that any one who for gain or any other reason assists our enemy is guilty of high treason and that the penalty is death and that we in Canada no less than the people in the United States, have the stern intent to impose it. Reprinted from Liberty Sept. 12.

FIVE TO CONTEST EDMONTON SEAT

Five candidates will contest the Edmonton provincial election Sept. 22 to fill the Alberta legislature vacancy created by the death of D. M. Dugan, Independent.

Official nomination papers were filed for Elmer Roper, C.C.F.; J. F. Lymburn, Independent; Major Nelles V. Buchanan, Liberal; J. B. Gillies, Social Credit; and W. (Paddy) Griffin, "soldiers" nominee.

NEWS NOTES

Elder C. R. Wing of the First Ward Bishopric was at the Temple Wednesday evening with some members of his ward.

Miss Jeannine Wilde was on the Sunday evening program at the 2nd Ward, rendering a very nice vocal solo.

Johnny Heggie, Ralph Richardson, Bill Kinsey and several other local boys are home from the service on "harvest leave."

Noel Keith was in the news Wednesday night as having brought down an enemy fighter that day in an engagement over the channel of western France. Noel got on the tail of his foe and followed him down with his cannon and machines blazing, and when another Nazi plane started after Keith, it was taken out of action by the guns of the Squadron Leader who saw the action from high up.

Locker System Ready For Cooling Installation

WEDDING BELLS

ACKROYD — EVANS

Miss Ruth, youngest daughter of Mr. and Mrs. J. W. Evans of Raymond, and Charles M., son of Mr. and Mrs. Ackroyd of Magrath, were married in the Cardston Temple on Wednesday, September 16th, with Pres. Edw. J. Wood officiating. The ceremony was witnessed by parents and a host of friends and relatives of both young people who extended congratulations and best wishes for a long and happy married life after the nuptial knot was tied.

In the evening, at the Evans home here, a reception was held where members of the two families gathered in large numbers to partake of the lovely repast and to enjoy the evening with the bride and groom. Ruth and Charles will make their home in Magrath where the groom is engaged in farming with his father.

Ruth has been a school teacher several years past, and this with her teaching in the various church organizations had put her in constant touch and association with the young people of the town with whom she is very popular and these join with all her other friends and this paper in extending best wishes to the couple for a long and happy married life. The groom has been home from a mission for only a few months and is not so well acquainted in Raymond.

HATFIELD — CRAWFORD

On Tuesday evening, September 8, a wedding of interest was solemnized at the home of Bishop J. O. Hicken, when Lavina Crawford, eldest daughter of Mr. and Mrs. Arthur Atwood of Raymond, became the bride of Elmo Wentworth Hatfield, only son of Mr. Scott Hatfield and the late Mrs. Hatfield of Woodstock, New Brunswick, and nephew of R. J. Fansett of Raymond. Bishop Hicken performed the ceremony.

The bride was charming in a

Good progress is reported at the local Cheese Factory and Locker Storage system, and by next week it is expected the factory will be about ready to steam up and test out equipment in preparation for the actual making of cheese.

The locker storage section of the building is all complete as far as the carpenter work is concerned, and they are ready for the electricians and the installation of the freezing system and control system to regulate them. There are 250 boxes ready, including 24 drawer type ones, and room for additional ones when needed.

While quite a large number have agreed to take boxes, it is money that counts, and the ones who have the work in charge, would like very much if all those who intend renting a locker for the first year of operation would call either at the Treasury Branch or the Home Bakery and pay the rental and let the management know just exactly how many will be required. Don't delay if you have any intention of supporting this industry to the extent of a locker, show it today by paying for same and letting the Directors know you are interested in making Raymond and district a better place.

Alfred Strate spent the week end in Cardston with his family. Alf has joined the engineering staff at the Factory for this campaign.

Paul Matisz, who recently graduated at Golden Head, B. C. as a 2nd Lieutenant, has now been promoted to a 1st Lieutenant.

dusty rose crepe gown on her dress lines with white accessories. Miss Doris Flexhaug was bridesmaid and wore a tweed suit with beige accessories, while Frank Navritil acted as groomsmen. Immediate relatives and friends were present.

The happy young couple will make their home in Raymond.

Mutual Openings Held

The opening social of both Second Ward, Piano Duett Ward Mutuals were held in the Misses Mabelle Anderson and respective Ward Halls Tuesday evening and as the storm had

Saxophone Solo, Billy Bowheld up all field work, good crowds were in attendance at both. Interesting and instructive programs, introducing the

Vocal Solo, Mrs. Laura Wat- son.

Piano Duett, Mesdames Emma Dahl and Maybell Anderson.

Skit, directed by Mrs. L. Bowden.

Vocal Duett, Misses Lucille Thompson and Ardell Palmer.

Reading, Miss Melba King.

Skit, directed by Leonard Wat- son.

Reading by Miss Marguer- de Graham.

The regular Saturday evening dance was held with Dow's Rhythms of Magrath providing the music. A good-sized crowd was present to enjoy the evening.

Miss Maiva Heringer, Johnny Heggie and Carl Salmon were speakers at the 2nd Ward Social meeting Sunday evening and a good audience was present to listen to them.

AN EVEN KEEL.

Like the ocean going ship which is happy when it can keep an even keel, is the nation and community that is able to maintain an even keel in matters of government and practice.

We are going through a trying period now. The war is draining our manpower, it is draining our finances, it is putting women and girls in men's places in thousands of occupations and is creating a new and different world. What will be the national outlook when the war drums cease and the hundreds of thousands of men return home to be rehabilitated. This is a question that will demand the greatest study and the wisest moves in keeping things on an even keel.

We have proved during the war that new wealth can be produced. Legislation is possible that will regulate buying and selling. Agriculture can be made profitable and attractive, and then lot of the great laboring class can be improved through better housing, better wages and better understandings between employer and employee. Are we going to ask all these various classes to think of all these improvements as only possible in war, and ask them to revert to 35c. wheat, to labor at \$2.00 a day, and to hovel instead of homes to come to when the day's work is done.

Can we expect the women and girls who have proven their worth in industry to return to their duties as homemakers and watch their menfolk and then struggle along on the

bare essentials of life?

We are fighting for freedom and democracy, and might we ask what is democracy? Does it include some degree of equality for all? Does it mean that the man who digs ditches will receive the same pay as the man who tells him where to dig, relatively speaking? Does it mean that provision will be made to allow men and women to work where they enjoy their labors and where they are anxious to deliver of their best instead of putting in time to get a pay check. Many of the people branded as failures, are that way because it is a case of a square peg in a round hole. There are very few people who do not enjoy working, but there are many who do not work to advantage nor success when compelled to work at what they do not enjoy.

Canada might as well face the fact that her population will demand improvement in these things it has been shown that such questions can be regulated. Why let down when peace comes because of the fancies and whims of a few people with money? Today there are no idle rich. Their unearned income is assisting to maintain a better level for all. Why could this not be continued? If we escape internal revolution and bloodshed it will be because we have leaders far-sighted enough to appreciate the fact that what our men in the service have fought and died for, is not to be discarded like an old shirt when the threat of an outside enemy ceases to exist. Why not keep a check-rein on these things now, and then it will not have to be done all over again.

IS CORN AN ESSENTIAL POULTRY FEED?

Experimental Farms News
In 1931 the Department of Agriculture published the pamphlet No. 128 entitled "Canadian Grown Grains in Poultry Feeding" from which the following quotation is taken. "Experiments upon the Experimental Farm System have shown

that corn may be expected to give slightly superior results to barley for egg production BUT WHEN VITAMIN DEFICIENCY OF THE LATTER GRAIN (BARLEY) WAS COUNTERACTED BY SUITABLE SUBSTITUTES TO THE RATION, SUCH AS COD LIVER OIL AND SUITABLE GREEN FEED, BARLEY BECAME EQUALLY EFFICIENT FOR EGG PRODUCTION."

This conclusion was reached not from an isolated experiment but from a series of twenty six separate feeding trials carried on over a period of seven years not only at the Central Experimental Farm, Ottawa, but at thirteen Branch Farms of the Experimental Farms System in all provinces of the Dominion, states George Robertson, Dominion Poultry Husbandman.

Similar experiments have been carried on at many of the American State experiment stations. J. M. More reporting from the Michigan Station states.

"To compare barley with corn as a grain for poultry, 2 lots of 80 Rhode Island Red pullets were fed for 10 months. The mash fed to lot 1 consisted of ground wheat, finely ground barley, alfalfa leaf meal, meat scrap, steamed bone meal, and salt, while lot 2 received a mash made up of yellow corn meal, finely ground oats, bran, flour middlings, alfalfa leaf meal, meat scrap, steamed bone meal & salt. The scratch grain in lot 1 consisted of equal parts of whole barley & whole wheat and in lot 2 equal parts of cracked yellow corn and wheat. Semi solid buttermilk was fed once a day, and during the hatching season 1 lb. of cod liver oil was included with each 16 lb. of buttermilk. Oyster shell, water, and lettuce were also fed. An attack of infectious bronchitis caused a high mortality in both lots. Candling the eggs during June and July showed that the yolks of the eggs laid in lot 1 were lighter in color than those in lot 2, and that the shells of the eggs in the barley-fed lot were not so strong as those in the corn fed lot. The percentage hatch of fertile eggs set was about 10 per cent higher in lot 1 than in lot 2. Over a 10 month period lot 2 produced 3 more eggs per bird than lot 1, but at a greater cost per dozen. These results, while not conclusive, indicate that the barley ration may be safely substituted for the corn ration.

In another study made by J. M. More of barley as a poultry feed, in which two lots of 180 and 200 chicks respectively were fed barley or corn, the cockles were removed at 10 weeks of age. Those fed barley weighed 86 grams each more than the corn-fed birds. The barley fed birds consumed more feed but the cost of a pound of gain and the mortality in both pens were practically the same. Many further reports showing that corn is not an absolutely essential feed could be given.

If one kind of poultry feed is short the best substitutes available should be used. If corn is available and can be purchased at fair prices in comparison with other grains,

it should be used as it is a highly valuable poultry feed. Barley properly balanced with concentrates, fish oil, alfalfa or cereal grains and so forth, will give just as good results as though the finest corn was fed.

If birds that have not been reared on barley refuse to eat it, do not be disappointed. No trouble will be experienced with birds that have been fed barley from hatching time or that have been fed it during the rearing period. But birds that have been corn reared may refuse to eat barley if it is supplied them after they go into laying quarters. Be patient and the birds will gradually acquire a taste for it and in a short time will consume it just as well as they will good oats or wheat.

Use home grown grains and exchange.

CROP REPORT

General—Crop returns to date in the Prairie Provinces indicate that yields of wheat, oats and barley will be considerable above average. Harvesting, however, is later than normal, and widespread heavy rains round the end of August have further delayed operations and caused much lodging of heavy crops. Fair weather has prevailed for the past few days and cutting generally has been resumed. There have been further scattered hail losses, and sawflies are active in southwestern Saskatchewan. Frosts have occurred at numerous points in the northern district, and grades will be adversely affected thereby. Labour is scarce and there is a shortage of storage space. Fodder is plentiful and pastures excellent. In the Province of Quebec, harvesting

conditions have been satisfactory and the outlook for crops generally continues favourable, although more moisture is needed in many districts. Grains promise above-average yields of good quality, some frost damage is reported in scattered districts and rot is in evidence in tomatoes and potatoes. Above average yields of canning and root crops are forecast. Pastures continue in good condition. A heavy crop of apples appears assured. In Ontario, threshing of spring grains has been practically completed and above-average yield are reported. Corn, sugar beets and other roots are progressing favourably and satisfactory returns are in prospect. Tobacco suffered slight damage from frost during last week end but pruning operations were well advanced and much of the crop has been harvested. In the Maritime Provinces good progress has been made with harvesting during the past two weeks but warm dry weather has retarded growth and rain is badly needed. The general outlook is, however, still considered to be favourable, owing to good early growth. In British Columbia, harvesting operations are proceeding in favourable weather, with average yields of most field and orchard crops in prospect. Exceptions are tobacco, hops and prunes, returns of which will be lighter than usual.

PRAIRIE PROVINCES
 Alberta—Harvesting has been resumed, following a period of unsettled weather, and operations are now becoming general. Crops are ripening slowly and considerable grain has lodged, due to excessive moisture. Severe frost damage is reported in northeastern districts. The sugar beet crop is progressing satisfactorily. Pasture is in excellent condition. Saskatchewan—The progress of harvesting varies greatly. Wet weather has further delayed the already late harvest but operations are now in full swing. Frost damage has occurred in the central and northern districts and will adversely

WEEKLY LETTER

STORING VEGETABLES

The degree of ripeness of vegetables decides to a very marked extent how well and how long they can be kept successfully in storage. This will be a formidable problem for all home and market gardeners on the prairies this fall because practically all vegetables are late in maturing due to the moist and cool season. In fact, many vegetables will have just begun ripening when the fall frosts arrive. Hence, it may be well to appraise the different methods of handling vegetables now with the view to reducing losses in storage.

With most vegetables at harvest time a certain proportion of the crop is green or quite immature and these should be sold or used first. For example, with onions the immature plants are known as "bottle-necks" because of the thick and fleshy stem on the bulbs. This year these immature plants are quite numerous and hence it is a wise practice to sort them out for immediate use.

A good practice for curing or forced ripening vegetables for storage is to place them in small piles in the field. If the nights are cold a covering of straw or old blankets can be used for protection. The piles should be stirred every four or five days and the spoiled specimens removed. In about two

or three weeks after piling the vegetables should be in fair condition to be placed in storage quarters. Practically all vegetables except celery can be handled in this way.

The vegetables are to be thoroughly dry before they are placed in storage. Excess moisture encourages rapid deterioration. The temperature of the storage room is an important factor in good storage. For most vegetables a temperature of 28 degrees F. is best.

In many cases of vegetable storage the cause of deterioration can be traced to crowding of vegetables and to contact with the boards or soil on which they are placed. This may be due to poor ventilation around the vegetables and also to the pressure on the parts that are next to the boards or soil. This condition can be remedied where small quantities are stored in the farm or town home by hanging the vegetables to the rafters of the storage room. Pumpkins, marrow, cabbage, and onions can be easily handled in this way. In fact, the practice of bunding onions into long ropes used by many of the original settlers was one of the most effective methods of keeping onions late into the following spring.

Certain root vegetables, such as carrots, parsnips, and beets must be completely covered with moist (not wet) sand for best results. Turnip and potatoes are best stored in a open bin.

market grades. There have been further scattered hail losses and lodging, and sawflies are active in the southwestern section, but prospects continue bright for the heaviest yields in many years. Manitoba—Heavy general rains have again retarded harvesting operations, but it is estimated that 75 percent of wheat and 60 percent of coarse grains have been cut. Threshing has commenced. Bright prospects continue for yields well above average for wheat and coarse grains, except flax. Sugar beets are progressing favourably.

DO NOT PUT HONEY IN A REFRIGERATOR

In order to preserve the delicate flavor of the essence of several points. First and foremost, wherever honey is stored, the place must be dry. Hence a dry kitchen shelf is a suitable spot for comb honey in which all the aroma of flowers is locked in its cells, while a dry cellar is ideal for the storage of extracted honey, but the cellar must be really dry.

Honey, states W. A. Stephen, Bee Division, Dominion Experimental Farms Service, should not be stored in an ice box or in a refrigerator, because, just as honey has incorporated the smell of flowers, so it will gather up the odors of other foods. Further, as the relative humidity in ice-boxes or refrigerators is high, honey will absorb

the moisture in the air. It is this reason that honey should not be kept in a damp cellar. Comb honey should be kept until it is to be used in the carton in which it was packed, and with reference to liquid honey in containers, it should be remembered that the friction top lids are not airtight. They should be replaced and pressed down after removing what honey was required. This will help retain the essence of flowers in the honey.

Men, Women Over 40 Feel Weak, Worn, Old?

Want Normal Pep, Vim, Vitality?

Does weak, rundown, exhausted condition make you feel faded out, old? Try Oxydol. Contains essential tonics, stimulants, often needed after 30 or 40. Supplies iron, calcium, phosphorus, vitamin B. Helps you get normal pep, vim, vitality. Indispensable size three (10¢) value only 35¢. For sale at all good drug stores everywhere.

COMPANY LIMITED

"Where You Get More of the Best for Less"

Want Ads.

FOR SALE—5 roomed house and lot. \$725.00.—W. C. Stone.

FOR SALE—3½ inch Webber wagon and 150 bus. grain tank, or will trade for grain. See Jas. Hawkins, Raymond.

TOP PRICES FOR YOUR HOGS—I buy hogs every Thursday at the Raymond Stock yards. Highest prices.—Ern. H. Nilsson, Raymond.

FOUND—A boy's jacket left in car between Carleton and Woolford road. Lost by one of two Raymond boys hitch-hiking between Waterton and Raymond. Owner may have same by paying for this ad. and identifying same.

Hospital Guide: "All the patients in this ward were struck by automobiles."

Visitor: "Looks like a bumper crop."

"I see you raise hogs down here almost exclusively. Do they pay better than corn and potatoes?"

"Wal, they do't suh, but hogs don't need no hoein'."

Freshman: "Why did the prof bowl out Gene for cheating in exam?"
Sophomore: "Aw, he just saw him counting his ribs during physiology test."

A distinguished professor of a noted university was delivering an address before a group of business men. At the conclusion, a manufacturer joined issue with him.

"Science is no benefit to me," he insisted.

"What your business?" enquired the professor.

"I manufacture suspenders."

"And where would your business be," was the next question, "if the law of gravity were suspended?"

NEWS NOTES

Bob Crawford, well-known here, is amongst those listed as missing in the Dieppe raid. Bob grew up here and was a member of the Dave Richardson family after the death of his parents.

According to the Department of Munitions and Supply the only anti-freeze we will have this coming winter will be one with an alcohol base. Some of the other liquids heretofore have all been requisitioned for war purposes.

The Municipal Council met in their regular session Tuesday of last week. Routine business occupied the time of the meeting and because of the busy season the meeting was made as brief as possible and business attended to.

For the first time in the experience of most of us, no nails could be purchased in town for a day or two last week. There were some sizes in stock, but some sizes were sold out and replacements were delayed in arriving. It is intimated that nails may be severely rationed before long.

A really heavy shower broke loose at 5 p.m. Sunday afternoon and continued during the evening. It will put a stop to harvesting until Tuesday noon at least. It was accompanied by thunder, which on the 13th of September we believe sets a record in this part of the country.

MODERN PIG MANAGEMENT

NEWS NOTES

(By H. G. L. Strang)

Recently I was able to visit a number of prairie farmers. I found that many wheat growers, at the earnest request of Government, have taken up pig production for the first time. Many different methods of pig management were to be seen but some of it unquestionably was bad. On some farms pigs were born hairless, a good percentage of the litters had died and the remaining pigs were not doing at all well.

It is obvious that many wheat growers are not aware of the latest up-to-date labour-saving methods of pig feeding and management. Those who are should, therefore, I suggest, handling pigs for the first time make special efforts to find out from their nearest Experimental Farm or University or Provincial Department of Agriculture, or from their District Agricultural Representative, the methods of feeding and management that would best suit the nature of their individual farms and the feed they actually have on hand.

I am sure that many young pigs now being lost can be saved, that the quantity of grain now fed can be cut down, and that much labour now expended in hauling food and water by hand can be avoided. Sows and litters require sunshine and exercise; growing pigs need sunshine and suitable feed, and above all lots of good clean water.

Following factors have tended to decrease supply and increase demand:—Turkey and Greece have recently received grain from Overseas—Crop yields in Kingdom and Western Europe central and south-eastern Europe were below normal this last year.

Mr. and Mrs. Owen Larson were Lethbridge visitors Saturday afternoon.

Mr. and Mrs. Fred Gardner were Saturday afternoon visitors to Lethbridge.

Dr. and Mrs. D. B. Fowler of Lethbridge were Raymond visitors Sunday at a sort of family reunion with their Uncle Ted and other members of the family.

Generally speaking the year has had its share of freaks. This past week hail did for 20 to 100 p.c. damage to crops in the Vulcan district, long past the season when hail is looked for. Wednesday here was decidedly warm, like a day in early August.

T. O. and L. D. King and families are enjoying a visit from their brother Ted, and sister Mrs. Nellie Ward, who both live at Almo, Idaho. Ted was called from here to a mission in Great Britain in 1908 and is just back now to report. He spoke briefly in Sunday evening meeting. He is delighted with the advancement of our town since he left.

year—Canada has agreed to ship Russia 9 million bushels of Hard Spring Wheat for Flour.

Following factors have tended to increase supply or decrease demand:—Crop prospects in Canada and Australia continue excellent—U.S. crop returns for winter and spring wheat are higher than for many years past—Crop yields in the United Kingdom and Western Europe central and south-eastern Europe were below normal this last year.

British W.A.A.F. Girls Learn To Be Balloon Crews

Members of the W.A.A.F. are One of the new W.A.A.F. training to take over the important job of manning barrage balloons thus freeing R.A.F. men for more active service.
